

Carbon Fiber Motorcycle Front Fender

This motorcycle front fender is made from carbon fiber for strength and light weight. It protects from road debris and water spray for better visibility and safety.

Product Overview

High-Performance Carbon Fiber Fender

This premium motorcycle front fender is engineered using advanced autoclave technology to deliver superior strength and flexibility compared to standard components. Crafted from high-quality Toray 3K carbon fiber prepreg fabric, it features a UV-protected clear coat for a durable, non-fading high-gloss finish. Designed for precise compatibility, this fender offers an easy installation process with fitment identical to OEM parts.

Material & Construction

Material Composition	Toray 3K Carbon Fiber Prepreg Fabric
Manufacturing Process	Autoclave Technology
Finish Options	Hi-Glossy, Matte
UV Protection	Yes

Compatibility & Fitment

Part Type	Replacement
Installation	Easy installation with OEM-equivalent fitment
Cutting Method	Water jet cutting
