

# Carbon Steel Pipe Tee Fitting

This carbon steel tee fitting connects or branches pipelines. It is suitable for welding or threaded connections and available in sizes from 1/2 inch to 72 inch depending on the type.

## Product Overview

### Industrial Carbon Steel Tee Fitting

This high-quality carbon steel tee fitting is engineered for robust performance in demanding industrial, HVAC, and plumbing environments. Designed to facilitate a secure 90-degree branch from a main pipeline, it ensures reliable distribution of fluids and gases. Constructed for durability and high-pressure resilience, this fitting offers a dependable solution for complex piping networks.

## Technical Specifications

### Connection Types

- Welding
- Threaded

Material	Carbon Steel
Common Applications	Plumbing, HVAC, Industrial Piping

## Performance Metrics

### Performance Features

High Pressure Rated • Corrosion Resistant • High Strength

Primary Function	90-degree branching for pipelines
