

Carbon Steel Plastering Trowel with Plastic Handle

This plastering trowel is made with a durable carbon steel blade for long-lasting performance. It also features a comfortable, ergonomic plastic handle for reduced fatigue during extended use.

Product Overview

Professional Plastering Performance

This carbon steel plastering trowel is engineered for the smooth and efficient application of plaster, drywall compound, and various finishing materials. Featuring a high-quality carbon steel blade, it ensures long-lasting durability and consistent performance on the job site. The ergonomic plastic handle is designed to minimize user fatigue, making it an ideal choice for both professional contractors and DIY enthusiasts aiming for flawless surface finishes.

Technical Specifications

Primary Applications

- Plastering
- Drywall Finishing
- Surface Smoothing

Blade Material	Carbon Steel
Handle Material	Plastic
Key Features	Ergonomic Design, Durable Construction, Smooth Application
