

Carbon Steel Quick Release Hydraulic Coupling ISO 7241-A

This hydraulic coupling is made from carbon steel and features a quick release mechanism. It is designed for use in construction, forestry, agriculture, and other demanding hydraulic applications.

Overview

ISO 7241-A Hydraulic Coupling

This carbon steel quick-release hydraulic coupling is precision-engineered for demanding industrial, agricultural, and construction applications. Designed to meet ISO 7241-A standards, it ensures reliable interchangeability with major industry-standard couplings. The unit features a robust ball-locking mechanism and induction-hardened critical parts to ensure durability and leak-free performance under pressure.

Technical Specifications

Key Design Features

- Induction hardened critical parts
- Precision machined from solid bar stock
- Dependable ball-locking mechanism

Construction Material	Carbon Steel
-----------------------	--------------

Available Valve Types	Poppet, Ball
-----------------------	--------------

Compatibility

Interchange Compatibility

Standard/Series

ISO 7241-1 Series A

Parker 6600

Perfecting K

Faster ANV

Aeroquip FD 56

Snap Tite 61

Dnp PAVX

Safeway S56
