

Carbonized Vertical Bamboo Flooring

This carbonized vertical bamboo flooring provides a durable and stylish flooring solution. Its vertical grain construction offers a unique aesthetic, while the carbonization process enhances the wood's natural beauty and strength.

Product Overview

Carbonized Vertical Bamboo Flooring

This carbonized vertical bamboo flooring offers a stylish and durable flooring solution for both residential and commercial applications. The vertical grain construction provides a unique aesthetic, while the specialized carbonization process enhances the wood's natural beauty and structural strength. Finished with a matt coating, this flooring reduces glare and provides a smooth, comfortable surface that is resistant to scratches and daily wear.

Technical Specifications
