Product Overview

High-Performance Cleaning Solution

This advanced carburetor and choke cleaner utilizes premium imported materials and a high-efficiency propellant to restore engine performance. It effectively dissolves stubborn grease, gum, and carbon deposits without requiring the disassembly of components. Designed to be safe for critical engine parts, it helps optimize fuel combustion, improve horsepower, and reduce harmful exhaust emissions.

Technical Specifications

Net Volume	450 ml
Shelf Life	5 years
Recommended Maintenance Interval	Every 6000 km

Compatibility & Safety

Storage Requirements

- Store at temperatures below 40°C
- Avoid direct sunlight
- Keep away from high heat sources
- Do not puncture or incinerate
- Do not store inside vehicles

Safety Compatibility	Binary catalytic cracker safe, Oxygen sensor safe
----------------------	---

Usage Instructions

How to Apply

Step	Action
Preparation	Remove air filter, start engine, and maintain medium speed
Internal Cleaning	Spray 1/3 into float chamber through fuel nozzle
Component Cleaning	Spray 1/3 on choke and inner wall of carburetor
External Cleaning	Spray remaining amount on outside to remove sludge
