

Cargo Transport Tricycle with 110cc Engine

This robust tricycle is engineered for cargo transport, featuring a durable frame and a powerful engine. It is suitable for delivery services, construction sites, and agricultural tasks.

Overview

Reliable Cargo Transport Solution

This robust three-wheeled motorcycle is engineered specifically for heavy-duty cargo transport in demanding environments. Designed for efficiency and durability, it features a reliable suspension system and a powerful 110cc engine that balances performance with fuel economy. It serves as an ideal workhorse for delivery services, construction site logistics, and agricultural operations.

Engine & Performance

Vehicle Type

Three-Wheeled Motorcycle • Cargo Transport

Engine Displacement	110 cc
---------------------	--------

Applications

Suitable Applications

- Delivery Services
- Construction Sites
- Agricultural Tasks

Key Features

Key Features	Durable Frame, Efficient Fuel Consumption, Easy Maneuverability, Reliable Suspension
