

Cargo Tricycle with Metal Bed

This tricycle includes a cargo bed for hauling. It is designed for utility and transportation purposes.

Product Overview

Versatile Cargo Solution

This cargo tricycle features a robust metal frame and a spacious rear metal cargo bed, designed to provide efficient transportation for various utility purposes. With its stable three-wheel configuration, it offers a reliable platform for hauling goods across short distances. The design prioritizes ease of use and durability, making it an excellent choice for logistical support in industrial or commercial settings.
