

Carton Liner Poly Bag Heat Sealing Machine

Poly bag sealer for heat-sealing carton liners. This liner sealing machine works from uncuffing the bag off the carton flaps, lifting up, to heat-sealing bag top and then folding it back in carton.

Product Overview

Automated Carton Liner Sealing Solution

This fully-automatic heat sealing machine is engineered to streamline the packaging process by sealing poly liner bags directly within cartons. It performs a comprehensive sequence of uncuffing, inward folding, vacuumizing (optional), heat-sealing, and final tucking. Designed for high efficiency, this system significantly reduces labor costs and material waste while maintaining simple operation and easy adjustments.

Performance Metrics

Inserting Capacity

3 cartons/min

Minimum Rate

5 cartons/min

Maximum Rate

Technical Specifications

Film Width Range	460 mm
Max Film Width	840 mm
Power Supply	3 phases, 7 kW
Compressed Air	6 bar
Air Consumption	100 NL/min

Dimensions

Applicable Carton Dimensions

Dimension	Range
Length	250-550 mm
Width	200-400 mm
Height	150-400 mm

Machine Dimensions (L x W x H)

3322 x 2177 x 2350 mm

Features

Primary Features

- Fully-automatic operation
- Optional vacuumizing function
- Customizable carton dimensions
- Reduces labor and material costs
- Easy to operate and adjust
