Overview

Automated Carton Finishing

This automatic cover folding and sealing machine is engineered for high-efficiency packaging lines. It streamlines operations by automatically folding top carton flaps and applying tape, ensuring a consistent and secure seal every time. Designed for industrial environments, it features adjustable settings to accommodate a wide range of carton dimensions, helping to reduce labor costs and increase overall throughput.

Operational Capacity

Conveying Speed

20 m/min

Max Speed

Maximum Carton Dimensions 600 x 500 x 500 mm

Minimum Carton Dimensions 200 x 150 x 150 mm

Technical Specifications

Power Supply 400W, 220/380V, 50/60Hz

Required Air Pressure 6 Kg/cm²

Machine Footprint 1770 x 850 x 1520 mm

Consumables

Compatible Tape Widths 48mm, 60mm, 75mm

Features

Key Operational Features

- Automatic top flap folding
- Adjustable height and width settings
- Integrated conveyor system
- Easy tape loading mechanism
- Adjustable tension control
