

Cash Register Stainless Steel Fabricated Part

Precision fabricated for cash register applications, this stainless steel part offers high performance. It is manufactured to exacting tolerances for reliable performance and seamless integration into cash register systems.

Product Overview

Precision Stainless Steel Components

This stainless steel fabricated part is specifically designed for integration into cash register and POS systems. Manufactured through precision die stamping, it offers high durability and exact tolerances for reliable mechanical performance. Our manufacturing capabilities extend across various industries, including new energy batteries, mobile devices, and custom OEM metal components.

Technical Specifications

Dimensions

130 mm
Length

62 mm
Width

1 mm
Thickness

Manufacturing Details

Manufacturing Process	Die Stamping
Material	Stainless Steel

Product Range

Service Capabilities

- Mould design and service
- Metal precision stamping parts
- Mechanical of new energy battery
- Conductive flexible connector
- Tablet PC case
- Mechanical of POS
- Mechanical of cash register
- Mechanical of mobile phone
- Mechanical of traction battery
- Mechanical of electric meter
- OEM metal and plastic parts

Customization

Customization Options

OEM Support • Custom Design • Sample Welcome

Application

Primary Application

Cashing machines and POS systems
