

Cast Check Valve with Bypass

This heavy-duty cast check valve is equipped with a bypass valve for industrial applications requiring reliable backflow prevention. The integrated bypass valve allows for pressure equalization and controlled flow during system startup or maintenance procedures.

Product Overview

Industrial Cast Check Valve with Integrated Bypass

This heavy-duty cast check valve is engineered for demanding industrial applications requiring reliable backflow prevention and controlled pressure relief. It features a robust construction with a bolted bonnet for secure sealing and simplified maintenance procedures. The integrated bypass valve is specifically designed to allow for pressure equalization and controlled flow during system startup or maintenance.

Technical Specifications

Valve Design

- Heavy-duty cast body
- Bolted bonnet design
- Integrated bypass system
- Pressure equalization capability

Applications

Target Industries

Oil and Gas, Chemical Processing, Water Treatment

Logistics & Trade

Trade Information

Parameter	Details
Minimum Order Quantity	1 Piece
Delivery Time	45 Days
Packaging	Wooden Case
Origin	China

Accepted Payment Types

T/T • L/C

Transportation Options

Ocean, Land, Air
