

Cast Iron Bench Vise with Swivel Base

This bench vise is made from cast iron for durability and reliable performance. It features precision-machined jaws and a swivel base that rotates 360 degrees for flexible workpiece positioning.

Product Overview

Professional Grade Workholding

The European Series Vise is a robust and versatile tool designed for secure clamping and holding of workpieces in various applications. Constructed from high-quality cast iron, it features precision-machined jaws for optimal grip and durability. Its swivel base allows for 360-degree rotation, providing flexibility in positioning the workpiece, making it ideal for metalworking, woodworking, and general fabrication tasks.

Construction & Design

Material	High-quality cast iron
Swivel Base Rotation	360 degrees
Jaw Features	Precision-machined, Replaceable inserts

Performance

Suitable Applications

- Metalworking
- Woodworking
- General fabrication

Operating Mechanism	Smooth-operating screw mechanism
