

Cast Iron Brake Drum

This brake drum is manufactured from high-quality cast iron, providing excellent heat dissipation and wear resistance. The machined braking surface ensures consistent friction and reliable stopping power for safe and efficient braking.

Product Overview

Precision-Engineered Brake Drum

This high-quality cast iron brake drum is designed for optimal braking performance, durability, and reliable stopping power. Featuring a precision-machined braking surface, it ensures consistent friction, excellent heat dissipation, and superior resistance to wear. Engineered to meet or exceed OEM specifications, this component provides a balanced construction to minimize vibration and ensure safe, efficient operation across a range of vehicle applications.

Technical Specifications

Standards Compliance

OEM Specifications

Material	High-quality cast iron
Key Performance Features	Heat dissipation, Wear resistant, Vibration balanced, Machined surface

Installation & Design

Mounting	Central mounting plate with multiple bolt holes for secure axle hub attachment
Installation	Precise dimensions for easy installation
