

Cast Iron Brake Drum

This brake drum is suitable for use in US, European, and Asian cars, trucks, buses, tractors, and trailers. It provides reliable braking performance and is constructed from durable cast iron for heat dissipation and wear resistance.

Product Overview

High-Performance Cast Iron Brake Drum

This heavy-duty brake drum is engineered for reliable braking performance across a wide range of vehicle types, including trucks, buses, tractors, and trailers. Constructed from durable gray iron, the component is precision-machined via CNC processes to ensure optimal heat dissipation and wear resistance. Designed for versatility, this product supports custom manufacturing based on customer drawings or samples.

Technical Specifications

Material	Gray iron
Machining Method	CNC Machining
Compatible Vehicle Types	Cars, Trucks, Buses, Tractors, Trailers

Logistics & Manufacturing

Production Lead Times

Process	Timeframe
Mould Making	15-20 days
Sample Preparation	5-7 days
Production	Approx. 20 days

Packaging	Pallets
-----------	---------

Business Advantages

Key Advantages

High Quality Control • Prompt Delivery • Competitive Pricing • Small Orders Accepted • Customization Available
