Product Overview

Heavy-Duty Brake Drum

This high-quality brake drum is engineered for demanding trailer and heavy vehicle applications. Constructed from durable cast iron, it provides exceptional heat dissipation and resistance to wear, ensuring reliable and consistent braking performance. Precision-machined surfaces promote optimal contact with brake shoes to minimize noise and vibration, meeting rigorous standards for fit and function.

Technical Specifications

Part Identifiers

- SS19922X
- J10051 S
- 34.7.310

Material

High-quality Cast Iron

Key Performance Features

Heat Dissipation, Wear Resistance, Precision-Machined, Vibration Reduction

Compatibility

Suitable Applications

Trailers • Trucks • Buses • Heavy Vehicles
