

Cast Iron Duplex Oil Strainer for Marine Applications

This cast iron duplex oil strainer is designed for marine applications. Its duplex design allows continuous operation, with one side filtering while the other is cleaned.

Product Overview

Marine Duplex Oil Strainer

This cast iron duplex oil strainer is engineered specifically for marine applications, ensuring reliable filtration in demanding environments. The duplex design allows for continuous operation, enabling one side to be cleaned or maintained without interrupting the flow. Built to comply with JIS marine standards, this unit provides robust performance and durability for essential marine oil filtration systems.

Technical Specifications

Available Sizes

- 5K 40-200 (F7208)
- 5K 20-40 (F7224 - Small Size)

Internal Materials

Component	Material
Body	Cast Iron / Cast Steel
Cover	Cast Iron / Cast Steel
Valve Seat	Stainless Steel
Valve	Cast Iron
Strainer Cage	Stainless Steel
Gasket	Non-Asbestos

Body Material	Cast Iron
JIS Standards	JIS F7208, JIS F7224
