

Cast Iron Duplex Oil Strainer

This cast iron duplex oil strainer is designed for efficient filtration of oil in marine applications. The duplex design allows for continuous operation even during maintenance.

Product Overview

JIS Marine Duplex Oil Strainer

This high-performance duplex oil strainer is engineered specifically for marine applications, ensuring continuous filtration of oil systems. Built from durable cast iron, this unit allows for uninterrupted operation during maintenance cycles, making it an essential component for critical machinery. Compliant with JIS marine standards, it provides reliable contaminant removal to protect downstream equipment.

Technical Specifications

Standard Compliance

JIS Marine

Material Construction	Cast Iron, Stainless Steel
Model Number	F7208
Pressure Rating	5K / 10K
Size Range	40mm - 200mm

Dimensional Data

Dimensions & Specifications

Nominal Size (mm)	A	B	C	Weight (kg)
50	180	90	130	15
65	210	105	140	20
80	230	115	150	25
100	270	135	180	35
125	300	150	200	40

Component Materials

Component Materials

- Body: Cast Iron / Cast Steel
- Strainer Case: Cast Iron / Cast Steel
- Upper Filter Cover: Cast Iron / Cast Steel
- Lower Filter Cover: Cast Iron / Cast Steel
- Handle Shaft: Stainless Steel
