Product Overview

Professional Outdoor Cooking Performance

This heavy-duty cast iron stove is engineered for high-performance outdoor and commercial cooking applications. Featuring a circular multi-jet burner design, it ensures even heat distribution and rapid heating for consistent results. Built for durability and stability, the unit includes precise brass control valves to facilitate fine flame adjustments and operational safety.

Technical Specifications

Material Composition	Cast Iron, Brass Components
Burner Configuration	Multi-jet concentric ring design
High Pressure Capability	Yes

Usage & Application

Suitable Environments

- Outdoor cooking
- Commercial kitchens
- Heavy-duty catering

Safety Features

Brass control valve • Stable leg support • Heat-resistant construction
