

Cast Iron Lubrication Oil Pump

Cast iron oil pump designed for lubrication systems in machinery. Features include a pressure relief valve, mounting flange, and inlet/outlet ports for fluid circulation.

Product Overview

Cast Iron Lubrication Oil Pump

This durable cast iron oil pump is engineered specifically for reliable lubrication systems in industrial machinery. It features an integrated pressure relief valve for system protection and a robust mounting flange for secure installation. Designed for consistent fluid circulation, it serves as an essential component for demanding industrial applications.

Technical Specifications

Suitable Applications

- Lubrication Systems
- Machinery Fluid Circulation
- Industrial Oil Delivery

Material Construction	Cast Iron
Key Features	Pressure Relief Valve, Mounting Flange, Industrial Grade
