

Cast Iron Medium Pressure Commercial Gas Stove Burner

This cast iron commercial burner is designed for medium-pressure gas stoves. It provides efficient heat distribution for even cooking in commercial settings.

Product Overview

Durable cast iron burner assembly designed for medium-pressure commercial gas stoves.

Commercial Grade Performance

This medium-pressure commercial gas stove burner is engineered for demanding kitchen environments, featuring robust cast iron construction for exceptional durability. Designed for consistent performance, it incorporates a high-pressure ignition valve and a high-quality switch mechanism to ensure long-term reliability. Its sturdy build provides the stability and heat output necessary for various professional cooking applications.

Physical Dimensions

Product Size	510 x 330 x 185 mm
