

Cast Iron Medium Pressure Gas Stove Burner

This cast iron gas stove burner is designed for commercial use. It features a medium-pressure ignition valve and a high-quality switch for long life.

Product Overview

Commercial Grade Cast Iron Burner

This medium-pressure gas stove burner is engineered for high-demand commercial environments, featuring a robust cast iron construction for exceptional durability. It is equipped with a high-pressure ignition valve and a long-life switch to ensure reliable performance during intensive daily use. The design focuses on efficient heat distribution and precise flame control, making it an ideal choice for professional kitchens and catering services.

Physical Specifications

Product Dimensions

510 mm

Length

330 mm

Width

185 mm

Height

Primary Material

Cast Iron

Technical Features

The burner features a heavy-duty cast iron body with a high-quality brass valve for precise flame management.

Pressure Level

Medium Pressure

Key Components

- High quality long-life switch
- Brass valve for precise adjustment
- Strategic gas emission ports
- Robust circular burner frame

Ignition Type

High Pressure Ignition Valve
