

Cast Iron Pipes, Fittings, and Couplings for Industrial Piping

Cast iron pipes, fittings, and couplings designed for industrial applications. These durable components are suitable for a variety of piping systems, providing reliable connections and structural integrity.

Product Overview

Industrial Cast Iron Piping Solutions

These high-quality cast iron pipes, fittings, and couplings are engineered for demanding industrial and plumbing applications. Built for durability and structural integrity, the system supports reliable fluid and gas conveyance in complex networks. With a versatile range of components including elbows, tees, and wyes, this piping solution ensures secure, leak-proof connections for both new construction and repair projects.

Available Components

Pipes • Couplings • Elbows • Tees • Wyes • Crosses

Technical Specifications

Material Options	Cast Iron, Ductile Iron, Alloy Cast Iron
Size Range	1-1/2 inch to 12 inch

Compliance & Standards

International Standards

- ASTM A888
- CISP1301
- CSA Standard
- ISO6594
- FEN877
- KSD4307
- IS3989
