

Cast Iron Round Worktable with T-Slots

This heavy-duty cast iron round table is designed to DIN876 standards. It features multiple radial T-slots for secure workpiece clamping and positioning.

Product Overview

Heavy-Duty Precision Worktable

This cast iron round worktable is engineered specifically for demanding metal forming applications. Its robust construction ensures exceptional stability and precision during operation. Designed with multiple radial T-slots, it provides versatile and secure clamping options for various workpieces, making it an essential component for high-accuracy machining environments.
