

Cast Iron Simplex Oil Strainer for Marine Applications

This cast iron simplex oil strainer is designed for marine applications. It efficiently removes particulate matter from oil to protect downstream equipment and maintain system performance.

Overview

Marine Simplex Oil Strainer

This cast iron simplex oil strainer is engineered specifically for marine applications, ensuring reliable filtration of particulate matter from oil systems. Designed to comply with JIS F 7209 standards, it provides essential protection for downstream equipment, helping to maintain optimal system performance and longevity. Its robust construction and straightforward design facilitate efficient maintenance and cleaning operations in demanding maritime environments.

Technical Specifications

Construction Materials

- Body: Cast Iron
- Strainer: Stainless Steel
- Strainer Cylinder: Stainless Steel

Pressure Rating

5K

JIS Standard

F 7209

Dimensional Data

Standard Dimensions (mm)

Size	A	B	C	Weight (kg)
5K-15	100	150	110	5
5K-20	110	160	120	6
5K-25	120	170	130	7
