

Cast Iron Spun Pipe

These cast iron spun pipes conform to ASTM A888 and ISO6594 standards. The pipes are made of durable cast iron material.

Product Overview

Cast Iron Spun Pipe Overview

These high-quality cast iron spun pipes are manufactured using a sophisticated negative pressure EPC production line. Constructed from durable grey iron, they are designed for reliability in industrial and construction applications. The product range includes various configurations such as no-hub pipes, single hub fittings, and sanitary tees, ensuring versatility for complex plumbing and drainage systems.

Technical Specifications

Available Types

- No-Hub Iron Pipe
- Single Hub Fitting
- Pipe Plug
- Short Sweep Bend
- Sanitary Tee

Material	Grey Iron
Production Method	High-tech Negative Pressure EPC Production Line

Quality & Compliance

Quality Assurance

Material Control • Dimension Testing

Surface Treatment	Color Painting
