

Cast Iron Submersible Water Pump

This submersible pump is designed for clean water applications in farmland, aquaculture, mining, and construction. It features high capacity, efficiency, and is easily moved and installed.

Product Overview

Cast Iron Submersible Water Pump

The CWQ submersible pump features a durable cast iron housing, designed for efficient and reliable water removal in demanding applications. This pump is engineered for long-lasting performance and is suitable for a variety of dewatering and wastewater management tasks. Its robust construction ensures resistance to corrosion and wear, providing extended service life. The pump is equipped with a high-efficiency motor for optimal energy consumption and powerful pumping capacity.

Operating Limits

Maximum Submersion Depth

5 m

Max Depth

Maximum Liquid Temperature	40
Max Passage of Suspended Solids	0.2 mm
Operating pH Range	6.5 - 8.5

Construction & Features

Housing Material

Cast Iron

Suitable Applications

Dewatering, Wastewater Management, Residential Use, Commercial Use
