

Cast Iron Wye Pipe Fitting

This cast iron wye fitting connects and branches pipes. It is suitable for drainage, waste, and vent (DWV) systems.

Product Overview

Cast Iron Wye Fitting

This centrifugal cast iron wye fitting is designed for reliable performance in demanding plumbing and drainage environments. Engineered for durability, this branch fitting allows for efficient flow splitting or combining within drainage, waste, and vent (DWV) systems. Its robust construction ensures long-term integrity in infrastructure projects.

Technical Specifications

Coating

Corrosion Resistant • Primed/Painted

Material

Centrifugal Cast Iron

Fitting Configuration

Wye / Branch Fitting

ID Mark

163

Applications

Compatible Systems

- Drainage Systems
- Waste Systems
- Vent (DWV) Systems
