

Cast Steel Crane Support Bracket

This cast steel crane support bracket is designed for heavy-duty lifting applications. It provides reliable support and load-bearing capacity in various crane systems.

Product Overview

Heavy-Duty Crane Support

This high-strength cast steel crane support is engineered for demanding industrial and construction environments. It features a reinforced design with precision-machined surfaces, ensuring optimal load distribution, structural integrity, and reliable performance under stress. The component is built to withstand significant vibration and wear, offering an extended service life for various crane systems.

Technical Specifications

Material	Cast Steel
Key Features	Heavy-duty, Corrosion-resistant coating, Precision-machined, High load-bearing

Design Details

Structural Characteristics

- Square upper section with internal cavity
- Central through-hole for mounting/cables
- T-shaped base for stability
- Reinforced triangular structure
- Cylindrical bore for mounting

Mounting Configuration

Threaded mounting holes • Central through-hole • T-shaped base
