Product Overview

JIS Marine Duplex Oil Strainer

The Cast Steel Duplex Oil Strainer is a high-performance filtration solution designed specifically for marine applications. Featuring a robust duplex configuration, this unit allows for continuous operation by enabling one strainer to be cleaned while the other remains in service. Built to rigorous JIS standards, it ensures reliable solid particle removal from oil systems to maintain machinery health.

Technical Specifications

Standard Compliance

JIS 5K • JIS 10K

Model Number	F7208
Body Material	Cast Steel
Strainer Filter Material	Stainless Steel
Valve Material	Cast Steel
Handle Wheel Material	Ductile Iron
Available Sizes (JIS 5K)	40mm - 200mm
Application	Marine, Oil Filtration, Continuous Flow
