Overview

Professional KVM Extension Solution

This CAT5 KVM extender provides a reliable solution for transmitting keyboard, video, and mouse signals over long distances. It also supports audio, microphone, and RS-232 data transmission, making it ideal for industrial, security, and broadcast environments. By utilizing a single CAT5 cable, it allows for seamless remote access and control of computers located up to 300 meters away.

Technical Specifications

Maximum Extension Distance	300 m
Supported Signals	Keyboard, Video, Mouse, Audio, Microphone, RS-232
Transmission Cable	CAT5
Display Support	VGA

Key Features

Key Capabilities

- High-resolution video support
- Integrated audio and microphone transmission
- RS-232 serial device control
- Single cable installation

Ideal Applications

Industrial Automation • Security Systems • Broadcast Environments • Remote Computer Access
