Product Overview

High-Performance Networking Solution

This CAT5e LAN cable is engineered for reliable data transmission in indoor networking environments. Available in both FTP (Foiled Twisted Pair) and SFTP (Shielded Foiled Twisted Pair) configurations, it provides versatile options to combat electromagnetic interference. Designed for Ethernet, Fast Ethernet, and Gigabit Ethernet networks, this cable ensures signal integrity for connecting computers, routers, and switches.

Technical Specifications

Cable Category

CAT5e

Supported Networks

- Ethernet
- Fast Ethernet
- Gigabit Ethernet

Design Features

- Twisted pair construction
- EMI protection
- RFI protection (SFTP variant)

Shielding Options

FTP, SFTP

Environment

Indoor

Usage

Common Uses

Device Type	Setting
Computers	Home
Routers	Office
Switches	Industrial
