

# CAT5e Network Cable with RVV Power Cable

This bundled cable combines CAT5e and RVV cables for simultaneous data and power transmission. It is designed for outdoor use, featuring PE insulation and a PVC jacket.

## ADDITIONAL IMAGES

## Overview

### Combined Data & Power Solution

This high-performance bundled cable integrates CAT5e networking capability with an RVV power cable, providing a streamlined solution for complex installations. Designed for reliable connectivity and efficient power delivery, it is specifically engineered for outdoor environments. This dual-purpose design is ideal for applications such as outdoor surveillance systems and wireless access point deployments.

## Technical Specifications

### Conductor Configuration

**4 cores**

Conductor Count

**0.4 mm**

Conductor Size

### Cable Type

CAT5e, RVV Power, Bundled

## Materials & Construction

### Insulation and Jacket

- PE Insulation for signal integrity
- PVC Inner Jacket
- PVC Outer Jacket for durability

### Conductor Material

Bare Copper

## Application & Environment

### Ideal Applications

Outdoor Surveillance • Wireless Access Points • Data Transmission • Low-voltage Power

### Environment

Outdoor
