

CAT5e Shielded Ethernet Patch Cord

This CAT5e shielded patch cord features a high-quality PC crystal head for excellent mechanical properties. Its integrated injection molding ensures a solid and reliable connection with a crystal head shell shielding package for reliable grounding.

Overview

High-Performance Shielded Connectivity

This CAT5e shielded Ethernet patch cord is engineered for reliable, high-speed network connections in demanding environments. Featuring RJ45 connectors with 50 % gold-plated phosphor bronze pins, it ensures optimal signal transmission and superior corrosion resistance. The shielded twisted pair (STP) construction effectively minimizes electromagnetic and radio frequency interference, making it an ideal choice for 10/100/1000Base-T Ethernet networks.

Standards & Compliance

Reference Standards	YD/T 926.3, IEC 60603-7, ANSI/TIA-568.2-D, ISO/IEC 11801
---------------------	--

Physical Construction

Materials

- Crystal Head: PC
- PIN: Phosphor bronze, 50 % gold plated
- Sheath: PVC

Plug Life	1000 cycles
-----------	-------------

Environmental

Working Temperature

-20 °C
Min

60 °C
Max

Storage Temperature	-40 °C ~ 60 °C
---------------------	----------------

Relative Humidity	10% ~ 90%
