

Category 5 Communication Cable, 25-Pair, 305m

Unshielded twisted pair cable, Category 5, with 25 pairs, designed for communication applications. Packaging contains 305 meters.

Product Overview

High-Performance Category 5 Communication Cable

This Category 5 communication cable is engineered for reliable data transmission in professional networking environments. Featuring a 25-pair unshielded twisted pair (UTP) design, it ensures stable connectivity for complex communication systems. Each unit is supplied in a 305-meter box, providing ample length for large-scale installations and infrastructure projects.
