

Category 5e STP Industrial Ethernet Cable

This is a high-performance Category 5e shielded twisted pair (STP) cable designed for reliable data transmission in demanding industrial environments. It is composed of 4 twisted pairs of solid copper conductors, ensuring optimal signal integrity and minimal crosstalk.

Overview

High-Performance Industrial Connectivity

This Category 5e shielded twisted pair (STP) cable is engineered for reliable data transmission in demanding industrial environments. Featuring a robust outer jacket, it provides enhanced durability and protection against physical damage and electromagnetic interference. With four twisted pairs of solid copper conductors, this cable ensures optimal signal integrity and minimal crosstalk for high-speed networking applications.

Technical Specifications

Cable Type	Category 5e STP (Shielded Twisted Pair)
Conductor Configuration	4 Twisted Pairs
Conductor Material	Solid Copper

Performance Features

Noise Immunity

Shielded • EMI Protection

Suitable Applications

- Industrial Environments
- High-speed Networking
- Gigabit Ethernet
- High Interference Areas
