

Category 5e UTP Ethernet Cable

Unshielded twisted pair cable designed for data transmission in networking applications. It features four twisted pairs of copper conductors, each with solid polyethylene insulation and a gray PVC jacket.

Product Overview

High-Performance Networking Solution

This Category 5e UTP Ethernet cable is engineered for reliable data transmission in modern networking environments. Featuring four twisted pairs of copper conductors with solid polyethylene insulation, it ensures stable connectivity for Ethernet, Fast Ethernet, and Gigabit Ethernet applications. Encased in a durable gray PVC jacket, this cable offers the flexibility and protection required for structured cabling systems in offices and data centers.

Technical Specifications

Category

Cat 5e

Max Data Rate

1 Gbps

Data Rate

Cable Type

Unshielded Twisted Pair (UTP)

Construction

Conductor Configuration

4 twisted pairs

Insulation Material

Solid Polyethylene

Jacket Material

PVC

Jacket Color

Gray

Applications

Common Applications

- Ethernet
- Fast Ethernet
- Gigabit Ethernet
- Structured Cabling Systems
- Network Device Interconnection
