

Category 6 Unshielded Twisted Pair Cable

This communication cable exceeds ANSI/TIA/EIA-568B.2 Category 6 standards. It features low transmission delay, consistent insulation, and high electromagnetic interference resistance and is suitable for Gigabit Ethernet applications.

► 标准：优于现行的ANSI/TIA/EIA-568B.2通信行业六类线缆标准的要求。
► 功能及优点：传输延迟低，连接稳定一致性强，具有高抗电磁干扰性，使传输信号的误码率明显降低。符合千兆以太网应用标准。
► 产品类别：适用于水平子系统的连接。

Overview

High-Performance Connectivity

This Category 6 unshielded twisted pair cable is engineered to exceed current ANSI/TIA/EIA-568B.2 communication standards. Designed for reliability, it features low transmission delay and consistent insulation to ensure high resistance to electromagnetic interference. It is an ideal solution for horizontal subsystem connections and supports demanding Gigabit Ethernet applications.

Technical Specifications

Shielding

Unshielded

Category Standard

Category 6 (Cat 6)

Construction

4-Pair Twisted Pair

Logistics

Packaging Length

305 meters

Product Code

TXL121

Performance Features

Key Benefits

- Low transmission delay
- Consistent insulation
- High electromagnetic interference resistance
- Reduced signal error rate
- Gigabit Ethernet compatible
