

Cathode Ray Tube Television

This is a cathode ray tube television with a black and red color scheme. It features integrated speakers on either side of the screen.

Product Overview

Professional CRT Display Unit

This cathode ray tube (CRT) television offers a robust display solution with a classic aesthetic. Featuring integrated side-mounted speakers, the unit provides reliable performance and a distinct visual design. The device is built with a glossy black frame and a sturdy red base, making it a suitable option for specialized retro-computing or vintage display requirements.
