

Cathode Ray Tube Television

This cathode ray tube television provides a classic viewing experience. The TV features a silver-colored frame and a wide aspect ratio, reminiscent of models from the late 1990s or early 2000s.

Product Overview

Professional CRT Television Unit

This cathode ray tube (CRT) television unit offers a classic viewing experience with a robust silver-colored frame. Designed with a wide aspect ratio and a stable matching base, this model integrates essential control buttons and a visual indicator light directly onto the front panel. It is an ideal choice for legacy equipment requirements, retro gaming setups, or specialized video monitoring applications.
