

Cathode Ray Tube Television

This is a high-resolution television. It utilizes cathode ray tube technology for displaying images.

Product Overview

High-Resolution CRT Television

This high-resolution cathode ray tube television offers a classic viewing experience with a traditional design. Equipped with integrated speakers on either side of the screen, the unit provides reliable audio-visual performance. Its sturdy, dark gray curved base ensures stability, making it a functional choice for traditional broadcasting and retro-media applications.
