

Cathode Ray Tube Television

This is a cathode ray tube (CRT) television with a black cabinet and white bezel. The TV has a standard 4:3 aspect ratio screen and control buttons on the front.

Product Overview

Vintage CRT Television

This classic cathode ray tube television features a robust design representative of late 20th-century consumer electronics. Its traditional 4:3 aspect ratio screen is housed within a durable black cabinet, complemented by a distinct white bezel. The front panel includes integrated control buttons, offering a nostalgic and reliable display solution for specialized vintage hardware applications.
