

Caulking Gun for Sealant Application

A caulking gun dispenses caulk, sealant, or adhesive from a cartridge. It provides a controlled flow for precise application in sealing and bonding.

Product Overview

Professional Sealant Application

This high-performance caulking gun is engineered for precise and consistent dispensing of sealants, adhesives, and various bonding materials. Designed for professional use, it features a reliable trigger mechanism that advances the plunger smoothly, ensuring controlled flow for clean, accurate application. It is compatible with standard cartridges and tubes, making it an essential tool for construction, maintenance, and renovation projects.

Technical Specifications

Ideal Use Cases

- Sealing gaps and joints
- Bonding construction materials
- General maintenance and repair

Application Compatibility	Caulk, Sealant, Adhesive
Dispensing Mechanism	Trigger-actuated plunger
