

# CCTV Power Supply Unit

This CCTV power supply unit converts AC to DC power for security systems. It provides multiple fused outputs for connecting CCTV cameras and other devices.

## ADDITIONAL IMAGES

## Overview

### Professional CCTV Power Supply Unit

This 12VDC switch-mode power supply is designed to provide stable, reliable power for up to 9 CCTV cameras. Housed in a durable metal enclosure with ventilation, it features individual channel protection, LED status indicators, and selectable input voltage for global compatibility. Ideal for indoor security installations requiring organized, managed power distribution.

## Electrical Specifications

Input Voltage	110-240V AC (Selectable)
Output Voltage	12 VDC
Total Output Power	60 W
Output Channels	9

## Safety & Protection

### Fuse Status Indicators

- LED ON: Fuse OK
- LED OFF: Fuse Fault

### Protection Features

Short Circuit Protection, Overload Protection, Over Voltage Protection, Fused Outputs

## Physical Characteristics

### Dimensions

**209.55 mm**

Length

**209.55 mm**

Width

**82.55 mm**

Height

### Usage Environment

Indoor Use Only
