

# CD MD Cassette Player Combo System

This combo system supports CD, MiniDisc (MD), and cassette playback. It includes integrated speakers, a digital display, USB and auxiliary inputs, and radio functionality.

## Product Overview

### Versatile Audio Solution

The DAV-200K is a comprehensive audio system designed for versatile playback needs, combining CD, MiniDisc (MD), and cassette tape functionality in a single compact unit. This all-in-one solution features integrated speakers, eliminating the need for external audio hardware, and includes a clear digital display for intuitive track and time management. With modern connectivity options like USB and auxiliary inputs alongside traditional radio support, it serves as a reliable and flexible audio playback system for various professional or commercial environments.
