Product Overview

Professional Protection

These safety shoes are engineered to meet the rigorous EN ISO 20345 S3 standards, providing essential protection for demanding industrial environments. Constructed with high-quality cowhide leather and a durable rubber outsole, they offer a balance of rugged safety features and daily wearability. Designed for comfort and longevity, the shoes include breathable mesh lining and reinforced structural elements to ensure stability and safety across various worksites.

Technical Specifications

Safety Standard

EN ISO 20345 S3 • CE EN 20345:2011

Materials

- Embossed cowhide leather upper
- Rubber outsole
- Mesh lining

Key Protection Features

Anti-Smash, Anti-Puncture, Anti-Static, Anti-Oil, Anti-Slip, Steel Toe, Steel Plate

Available Sizes

36-46

Color

Black

Design & Comfort

Comfort & Design

- Breathable mesh surface
- Non-slip sole with elasticity
- Reinforced stereotypes for structure
- Integrated air holes for circulation

Maintenance & Usage

Proper Maintenance

To maintain shoe integrity, store in a ventilated environment away from heat sources after each use. Regularly wipe off dust and use a damp rag for cleaning if necessary. Do not use metal brushes, as they may damage the material.

Recommended Applications

- Construction Sites
- Production Workshops
- Outdoor Trips
- Mechanical Exploration
