Product Overview

Professional Hearing Protection

These industrial-grade earmuffs feature a unique double-shell design that provides a high noise reduction rating for demanding environments. Engineered with a padded headband and generous ear cup space, they offer extended comfort and breathability for all-day wear. Designed for durability, they are an essential safety solution for construction, manufacturing, and general high-noise industrial applications.

Technical Specifications

Model Number	HRP230
Certifications	CE, EN352-1:2002
Color	Yellow

Materials & Construction

Material Composition

Component	Material
Ear Cup	ABS
Cushion	Foam

Usage & Safety

Recommended Applications

- Loud machinery operation
- Industrial manufacturing
- Construction sites
- Engine maintenance
- Power tool operation

Usage Warnings

- Required for noise levels above 80dB
- Inspect frequently for cracks or leakage
- Spectacle frames may affect acoustic performance
- Hair between pads and head may reduce effectiveness

Storage & Care

After use, store the ear defenders in a cool, dry place, out of direct light and protected from frost. Keep them in their original packaging when not in use to maintain integrity. Regularly inspect cushions for wear and tear; if damage is discovered, the unit must be replaced.
