Product Overview

Universal Cassette A/C Control System

This advanced universal control system is designed specifically for ceiling cassette air conditioning units, offering enhanced precision and reliability. It features integrated water level management with automatic pumping capabilities and a digital display for easy monitoring. The unit is designed for durability and ease of use, featuring built-in self-diagnostic tools to identify failures quickly.

Key Features

Main Features

Water Level Control, Self-Diagnosis, Auto Restart, Memory Function, Independent Outdoor Fan Control

Technical Specifications

Model Number	QD-U30A+
Input Voltage	DC12V

Control Functions

System Controls

- High/Medium/Low Fan Speed Control
- Swing Function
- Water Pump Control
- Independent Outdoor Fan Control
- Temperature Sensor Interface

Optional Modes

Auto Restart • Memory Function
