

Ceiling Fan with Integrated Light

This ceiling fan is designed for residential or commercial use. It features aerodynamically designed blades for efficient airflow and quiet operation, along with a downrod mounting system and integrated light fixture capabilities.

Product Overview

Efficient Airflow and Illumination

This ceiling fan combines effective air circulation with integrated lighting, making it a versatile solution for both residential and commercial indoor environments. Designed with three aerodynamically shaped blades, it ensures quiet operation while maintaining optimal airflow performance. The unit features a sturdy downrod mounting system, providing stability and reliable ventilation for various room sizes.

Design & Construction

Number of Blades	3
Mounting System	Downrod
Finish	White

Features

Lighting	Yes
Suitable Applications	Residential, Commercial, Indoor
