

Ceiling Mount Motion Detection Sensor

This ceiling-mounted sensor is designed for telecommunication engineering projects. It is designed for reliable motion detection in security systems, lighting control, and automation applications.

Product Overview

Professional Ceiling Mount Motion Sensor

This ceiling-mounted sensor is engineered specifically for professional telecommunication and automation projects. Designed for seamless integration, it provides reliable motion detection in diverse environmental settings. Its compact and versatile architecture makes it an ideal solution for modern security systems and automated lighting controls.

Technical Details

Patent Reference	ZL200830172187.X
Mounting Style	Ceiling Mount

Application

Primary Applications	Security Systems, Lighting Control, Automation, Telecommunications
----------------------	--
